- Update the get available resources to take a limit and load only that amount of available resources otherwise load 100 available resources

GET localhost:5000/api/resources/:limit/available

- Search resource by name (real-time fetching functionality is added, need to verify)

GET localhost:5000/api/resources/search?query=ph
(Here you can get the output as "`Physics Lab 101`".

- Delete resource functionality

DELETE localhost:5000/api/resources/:id

- Update email

PUT localhost:5000/api/users/change-email

```
{
    "newEmail": "kdrm1542@gmail.com"
}
```

- Update password

PUT localhost:5000/api/users/change-password

```
{
    "currentPassword": "adminPassword123",
    "newPassword": "adminPassword123456"
}
```

- Delete a user (only admin)

DELETE localhost:5000/api/users/:id

- Create a course

POST localhost:5000/api/courses
